Robert has a wealthy Swedish wife, Anna, and they have a daughter who is a practising doctor in a hospital in Stockholm. There is also Robert’s prot_g_Peter Tshabalala, junior in the organisation, yet he gets the call to return to South African to join the democratic government. What follows is a story of conspiracies, lies, back stabbing and disappointments. Robert and his family are faced with the challenges of a South Africa that has changed radically from the one he remembers from more than thirty years ago. The government, in his opinion, does not seem to uphold the principles enshrined in the Freedom Charter. There is also conflict within his own family. Robert wants to stay in South Africa, while his wife and daughter want to go back to Sweden. Their love is tested to breaking point and difficult decisions have to be made by every individual. As with Kani’s very successful and often-performed previous play, Nothing but the Truth, the ambiguities of freedom and of personal commitment are explored in this play.</p>

<p>The Three-Minute Classroom Walk-Through-Carolyn J. Downey 2004-04-20 Change the entire school culture with this collaborative method of supervision! For years, the classic supervision model has frustrated both principals and teachers by fostering superior-subordinate relationships, focusing on teacher conformity rather than growth, or producing checklist data that are irrelevant to the curriculum. The Three-Minute Classroom Walk-Through offers a practical, time-saving alternative that impacts student achievement by cultivating self-reliant teachers who are continuously improving their practice. This method answers principals' key questions: Is the work of my teachers aligned with district curriculum? Are my teachers using research-based "best practices"? Are they choosing the instructional strategies that will promote student achievement?</p>

<p>The Dream House-Craig Higginson 2016-04 A farmhouse is being reproduced a dozen times, with slight variations, throughout a valley. Three small graves have been dug in the front garden, the middle one lying empty. A woman in a wheelchair sorts through boxes while her husband clammers around the old demolished buildings, wondering where the animals have gone. A young woman - called 'the barren one' behind her back - dreams of love, while an ageing headmaster contemplates the end of his life. At the entrance to the long dirt driveway, a car appears and pauses - pointed towards the house like a silver bullet, ticking with heat. So begins The Dream House. Craig Higginson’s riveting and unforgettable novel set in the Midlands of KwaZulu-Natal. Written with dark wit, a stark poetic style and extraordinary tenderness, this is a story about the state of a nation and a deep meditation on memory, ageing, meaning, family, love and loss. This updated 2016 edition contains new content, with Craig Higginson exploring the background to The Dream House, his varied experiences in a farmhouse in KwaZulu-Natal and the subsequent and poignant motivations for this moving novel.</p>

Learning design supports all pedagogical approaches, content areas, and fields of education. The book opens with a new synthesis of the field of learning design and its place in educational theory and practice, and goes on to explore the implications of learning design for many areas of education—both practical and theoretical—in a series of chapters by Larnaca Declaration authors and other international experts.</p>

<p>Science Education and Curriculum in South Africa-Oscar Koopman 2016-11-01 This book explores the impact of the socio-historical, political, and economic environment in South Africa, both during and after Apartheid. During this time, the South African education system demonstrated an interest in a specific type of knowledge, which Koopman refers to as ‘a science of government’. This ‘science of government’ leaves the learners with a blurred understanding of science that is disconnected from external nature and human nature, and is presented as a series of abstract concepts and definitions. The book also investigates the dialectical tensions between the science curriculum and the role of the teacher as an active implementer of the curriculum. The book draws on the work of various phenomenological scholars, namely Edmund Husserl, Martin Heidegger, Merleau-Ponty, and Max van Manen to discuss these tensions.</p>
<p>Pidgin and Creole Languages-Glenn Gilbert 2019-03-31 This book is for the memory of John E. Reinecke, a man whose humanistic activism and sharp-hewn scholarship helped to shape the scientific study of pidgin and creole languages throughout much of the twentieth century. Reinecke was both a social reformer and a leading sociolinguistic researcher working with creole languages and societies that derive from diverse groups of people thrown into close social contact. Most notably, Reinecke’s keen sense of social justice has had a telling effect on the social history of Hawaii. Along with his persistent efforts to obtain a fair and equal share for wage earners in sharply stratified societies, his attention early became focused on their language. By encouraging others to study what he called “marginal languages,” he was able to bring to them (and to the extraordinary issues—theoretical and practical—which they raised) a measure of prestige, both in the eyes of their speakers and in the increased attention accorded them by students of language and society. The book presents a description of Reinecke’s life and work, the text of his own last paper on creolistics, and seventeen papers which reflect the range and vitality of the field that he did so much to open. Some of the papers reflect the issue which has come to dominate creole studies—the debate over the role of universals and of specific substrata as competing explanations of the amazing similarities that creoles, and perhaps pidgins also, exhibit across the world. Many describe the intense language contact within which language contraction and expansion occur (they do this either directly, or by supplying new data which will eventually feed such descriptions), and and some are our belated response to calls which Reinecke made in the 1930s. Fifty years ago, he saw the need for the kind of comparative studies which are only now under way—in, for example, Hazel Carter’s paper, which represents a pioneering attempt to compare the suprasegmentals of English-based Creoles on both sides of the Atlantic. In his last years, Reinecke strongly supported research on contact languages with non-European lexical bases. He thought this was the area from which future creole studies would derive the greatest theoretical and practical gain, and in this volume six papers answer his call by analyzing such pidgins and creoles.</p>
